## Financial Data Analysis: Microsoft, Tesla, and Apple

## Introduction

This notebook analyzes the financial performance of Microsoft, Tesla, and Apple for the last three fiscal years using SEC 10-K filings. We will extract key financial figures and examine growth trends to derive insights.

## **Data Metrics**

We will analyze the following financial metrics:

- Total Revenue
- Net Income
- Total Assets
- Total Liabilities
- Cash Flow from Operating Activities

## **Analysis Goals**

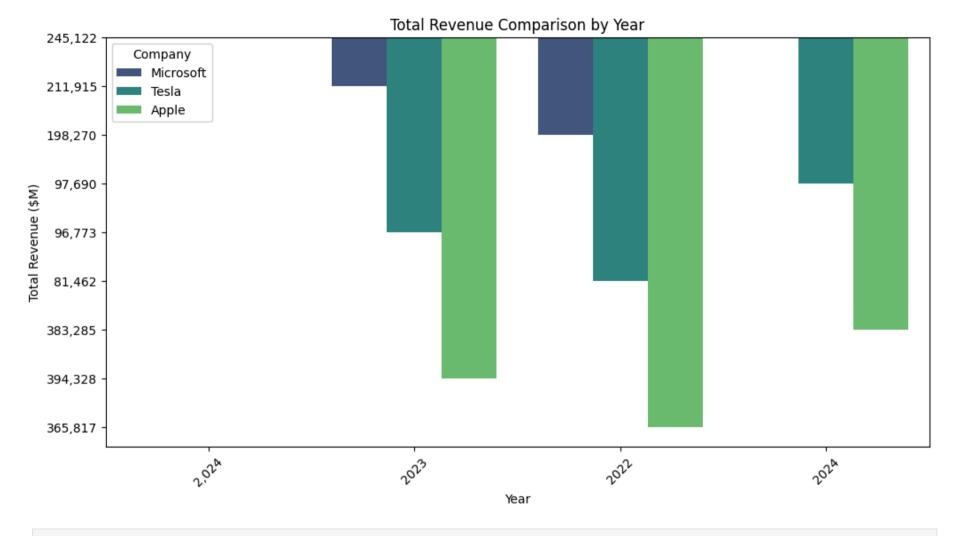

- Calculate **Year-over-Year Growth** for each metric
- Compare company performance
- Visualize trends using charts

```
In []: !pip install matplotlib seaborn
In []: !conda install matplotlib seaborn -y
In [23]: # Import necessary Libraries import pandas as pd
```

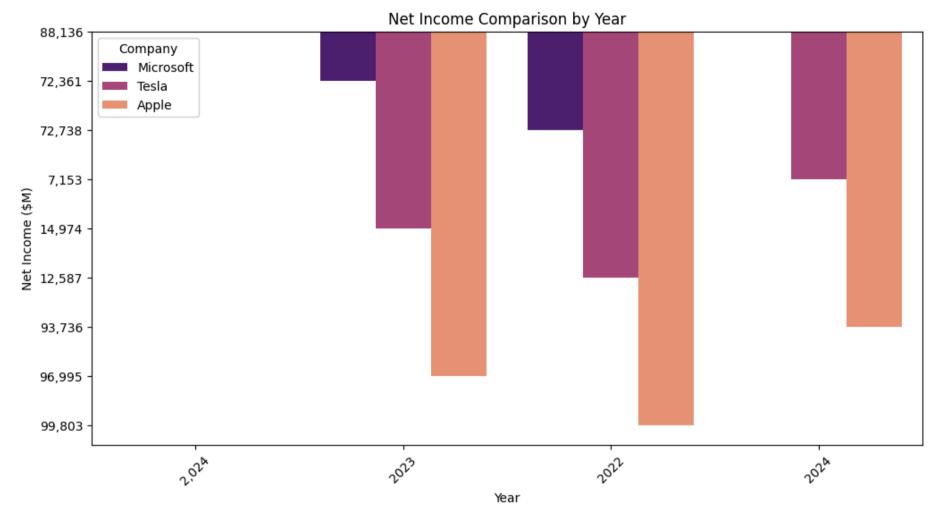

```
import matplotlib.pyplot as plt
         import seaborn as sns
         # Load the CSV file (update the correct path if needed)
         df = pd.read csv("D:/NYUAD/Internships/10K report.csv")
In [24]: # Print column names to check for issues
         print("Column Names in CSV:", df.columns.tolist())
         # Rename columns to match properly
         df.columns = df.columns.str.strip() # Remove unwanted spaces
         df.rename(columns={
             "T Revenue": "Total Revenue",
             "Net income": "Net Income",
             "T Assests": "Total Assets",
             "T Liabilities": "Total Liabilities",
             "Cash Flow (Operation)": "Cash Flow from Operating Activities"
         }, inplace=True)
        Column Names in CSV: ['Company', 'Year', 'T Revenue ', 'Net income ', 'T Assests ', 'T Liabilities ', 'Cash Flow (Operation)']
In [25]: # Convert 'Year' column to string for proper visualization
         df["Year"] = df["Year"].astype(str)
         # Display the cleaned dataframe
         print(df)
              ______
         # ★ **Step 1: Table Representation**
         summary = df.pivot table(index=["Company", "Year"],
                                  values=["Total Revenue", "Net Income", "Total Assets", "Total Liabilities", "Cash Flow from Operating
                                  aggfunc="sum")
         # Display the summary table
         print(summary)
```
